APPENDIX: Estimation of potential health care efficiency gain

Number of patients, health gains and cost-savings

LET OP: Dit is een verplichte bijlage bij uw projectidee. U dient dit bestand (als PDF) toe te voegen als bijlage bij uw aanvraag in ProjectNet. Het bestand mag maximaal 2 pagina's (A4) beslaan en de lay-out dient niet te worden veranderd. Zorg ervoor dat uw tekst zichtbaar blijft binnen het tekstveld! Andere bijlagen dan deze worden niet geaccepteerd.

1) Yearly number of patients in the Netherlands that will receive intervention targeted in this proposal

Incidence (if applicable) *Population/Time period*
The incidence rate is the number of new cases per population in a given time period

Prevalence (if applicable)
The prevalence is the proportion of a population found to have a condition

Yearly number of patients in the Netherlands (a)

Please explain numbers quoted above (max. 500 characters) *characters left: 10*

References or sources used (max. 500 characters) *characters left: 12*

2) Estimate the potential effects on health from the intervention(s) that will be evaluated in this proposal compared to usual care. Preferably in (quality adjusted) life years, (QA)LY's, or another generic measure. This should be the primary outcome measure in your proposal (or related to).

	<i>Effectsize</i>	<i>Outcome measure</i> <i>(QALY's/other generic measure)</i>
Effect of usual care (b)	%	
Effect of intervention to be evaluated (c)	%	
Potential effect on health of new intervention compared to usual care, patientlevel (c-b)		

Please explain numbers quoted above (max. 500 characters)

characters left: 143

4) Summary of potential health care efficiency gain / cost savings (max. 1000 characters)

Use this text in ProjectNet, tabblad 'relevantie', subheading 'ANTICIPATED COST-EFFECTIVENESS'
