II.1.4) Short description

TenneT has a legislative obligation to maintain an asset register. It also needs asset data for its core business processes. The current TenneT Asset Register BMR contains several data types which are related and need to be interfaced to systems using asset information. The asset data consists of asset parameters, geographical data, drawings, and additional documents like manuals..

This asset data needs to be registered and managed.

The new Asset Registration system and Asset Repository project is started to improve the effectivity, efficiency and flexibility of the current ADM environment.

The goal of this tender is to conclude an Agreement with one supplier for delivery, implementation and support of an Asset Registration System and Asset Repository for both TenneT TSO B.V. as for TenneT TSO GmbH.
