Main code:

72000000 - IT-diensten: adviezen, softwareontwikkeling, internet en ondersteuning

Supplementary code:

-

II.1.3) Type of contract

Services

II.1.4) Short description

The Asset Data Management (ADM) department is responsible for data management, information standards, and monitoring the data quality of the Tennet Assets Register (in Dutch: Bedrijfs Middelen Register (BMR)) and provisioning related functionalities.

The ADM department counts approximately 50 data administrators and data analysts who are using several specific applications to manage and analyze the TenneT Asset data. The data that is managed includes both unstructured (documents and drawings) and structured data that is tightly integrated. The managed structured Asset data consist of alphanumeric- and geographical data (actual locations and schematic representations). Several solutions are used to provide Asset data and information to the TenneT organization, e.g. GIS viewer, reports (BO, Excel), GIS/CAD files, etc.

In order to execute a tender later this year, TenneT is currently conducting a market analysis.

II.1.5) Estimated total value

Value excluding VAT: - Currency: -

II.1.6) Information about lots

This contract is divided into lots: no

II.2) DESCRIPTION

II.2.1) Title

-
