Address of the buyer profile:

<http://www.schiphol.nl/aanbestedingen>

I.2) JOINT PROCUREMENT

-

I.3) COMMUNICATION

Additional information can be obtained from

the abovementioned address

I.6) MAIN ACTIVITY

- Airport-related activities

SECTION II: OBJECT

II.1) SCOPE OF THE PROCUREMENT

II.1.1) Title

Beforehand awarding, in case of voluntary transparency, a Health, Safety and Environmental Management software platform to Ideagen PLC

Reference number: -

II.1.2) CPV code(s)

Main code:

72200000 - Softwareprogramming en -advies

Supplementary code:

-

II.1.3) Type of contract

Services

II.1.4) Short description

After the introduction of the product Q-Pulse from Ideagen (Supplier) 4 years ago Schiphol Nederland BV (SNBV)) has the intention at the end of the current contract with Supplier to conclude a new contract for the maximum period of 8 years . This announcement is done in CASE OF TRANSPERANCE IN ADVANCE.

II.1.5) Estimated total value

Value excluding VAT: - Currency: -

II.1.6) Information about lots

This contract is divided into lots: no

II.2) DESCRIPTION

II.2.1) Title

-

Lot No: -

II.2.2) Additional CPV code(s)

-

II.2.3) Place of performance

NUTS code:

NL NEDERLAND

NUTS code:

NL329 Groot-Amsterdam

Main site or place of performance:

-

II.2.4) Description of the procurement:

(nature and quantity of works, supplies or services or indication of needs and requirements)

After the introduction of the product Q-Pulse from Ideagen (Supplier) 4 years ago Schiphol Nederland BV (SNBV)) has the intention at the end of the current contract with Supplier to conclude a new contract for the maximum period of 8 years . This announcement is done in CASE OF TRANSPERANCE IN ADVANCE.

Q- Pulse is a software platform that the SNBV organization uses in the area of Health, Safety and

Environmental Management (Incident, Risk and Compliance management) as well as Security compliance.

It supports SNBV in continuous improvement processes and in terms of the management of risks, in the effectiveness of control measures and identification of new risks. Keywords are 'Compliant' and 'In Control'.

To facilitate the process of registration, classification, analysis and reporting Q-Pulse has several interfaces (API) with other internal and external IT systems.

Interfaces:

- Schiphol data-warehouse and Business Intelligence infrastructure
- Dutch Meteorological Institute
- Flight Information Systems
- Mobile apps
- Risk Management

Performance:

The current Airport Safety management system handles more than 10.000 events per year, facilitates around 500 (desktop and mobile) users and has several databases with their own standards and policies (e.g. GDPR, Cyber Security and so on). SNBV has classified the

Airport management system as a mission critical platform and therefore has a high level of availability, confidentiality and integrity

Next to that registration of Aviation incidents has to comply with the format of EASA (ECCAIRS). The system will report via push-messages to systems of 4 involved governmental organizations. To facilitate an easier event announcement SNBV will introduce an API to use the Airport Community App.

The functionality of the Q-Pulse product currently in use at SNBV is:

- Event registration (audits, occurrences, inspections)
- Event evaluation using the SNBV risk matrix and SNBV rules
- Event reporting
- Event monitoring (workflow management to apply corrective/preventive action tracking in the PDCA

Circle of Demming)

- Reports on ECCAIRS format / instant and rule-based messaging to third parties
- Form and workflow designer
- User- and authorization management

Terms and conditions:

The tool has to comply with GDPR and SNBV ICT-security governance. SNBV ICT purchase conditions will apply.

II.2.14) Additional information:

-

II.3) ESTIMATED DATE OF PUBLICATION OF CONTRACT NOTICE

08/02/2019

SECTION IV: PROCEDURE

IV.1) DESCRIPTION

IV.1.8) Information about the Government Procurement Agreement (GPA)

The procurement is covered by the Government Procurement Agreement: no
