II.1.4) Short description

The Port of Rotterdam, Gasunie and EBN are jointly preparing a new project in which CO₂ generated by industry in Rotterdam's port area is captured and stored in empty gas fields deep in the North Sea seabed. The three companies have joined strengths under the project banner Porthos: Port of Rotterdam CO₂ Transport Hub & Offshore Storage.

The CO₂ will be transported through an offshore pipeline to a platform in the North Sea, approximately 20 kilometers off the coast. From an existing platform, the CO₂ will be pumped in an empty gas field. The empty gas fields are situated in a sealed reservoir of porous sandstone, more than 3 kilometers beneath the North Sea.

Starting with a RFI, this tender aims for contractors for the offshore pipeline.
