II.1.4) Short description

Since 2003 the CEER has performed several cost efficiency benchmarks of electricity and gas transmission system operators (TSO(s)), the most recent being the CEER TSO Cost efficiency Benchmark 2018 (TCB18) study with reference year 2017 . Formally, each benchmark is procured by one of the national regulatory authorities (NRA(s)) on behalf of CEER . The purpose of these benchmark studies is to derive a static cost efficiency figure (TOTEX based) for each of the participating TSOs. . TSO benchmarking is of relevance to NRAs as European regulation stipulates that tariffs of a TSO shall reflect the actual costs incurred insofar as these costs correspond to those of an efficient and structurally comparable network operator . To follow up TCB18, CEER anticipates to start a next benchmark in 2021 referred to as the CEER TSO Cost efficiency Benchmark 2021 (TCB21) with reference year 2021.
