#### II.1.4) Short description

The subject of the contract is delivery of a newly built Atomic Layer Deposition system (hereafter referred to as: ALD).

An ALD is a machine in which thin layers of material can be deposited. The machine will be used in a research and development environment for fabrication of nano and micro scale layers in the department of Materials Science and Engineering (MSE) of the Delft University of Technology. The ALD system will be used by research technicians, Postdocs, PhDs and MSc and BSc students doing their final project.

This project includes:

- manufacturing;
- factory acceptance test;
- freight and shipping (DDP incoterms 2010);
- installation on site at TU Delft;
- site acceptance test;
- training of personnel (one research technician, one postdoc and two PhD's).

The maximum total project costs may not exceed € 330.000,- excl. VAT. The system must come with a with a vacuum load-lock.

Read:

The contracting authority wants to inform that a rectification has been made to some technical requirements in Chapter 6 "Schedule of Requirements". In response to questions received, the contracting authority believed that a number of requirements should be lapsed or amended. The main requirement that has been lapsed is that no longer a turbo pump is required.

The adjustments have been incorporated in the Information Notices documents. This document can be consulted via the tender documents folder on the Negometrix platform, tender 174830 Atomic Layer Deposition.

Due to this rectification a new timeline for the submission of the tender document is incorporated.
