II.1.4) Short description

An IRMS is the high accuracy workhorse of every stable isotope laboratory, especially when a laboratory wants to be a player in high precision work, such as the isotopes of atmospheric CO₂. Also, for the maintenance and upgrade of international isotopes scales such an instrument is indispensable. The instrument can be used for stable isotopes of all the light elements H, C, N, O and S. The capability of H and O isotope analysis will be put to use in the development of a new research line that connects isotope sensitivity to the detailed processes inside fuels cells and during electrolysis (ESRIG and ENTEG). In addition to in-house research, the IRMS will be also used for collaboration with, and providing services to, third parties in the Netherlands and elsewhere.
