II.1.4) Short description

Due to the energy transition, Client faces significant increase in the development of the power grid and – as a result – an increased demand in Power Transformers. To be able to achieve its goals, a steady and reliable supply of high quality Power Transformers is necessary, as is the flexibility of Contractors to scale production when necessary.

Therefore, Client is looking for Candidates who can supply Power Transformers with a continuous high quality and a reliable and efficient production and delivery process. In this Tender procedure the participating Tenderers will be scored on aspects in the areas of price, (design) techniques, quality assurance, security of delivery (i.e. reliability, delivery time flexibility) and flexibility in volumes.

To increase efficiency Client standardized the range of Power Transformers to 12 types. Once the design of a type has been approved by Client, for following orders of this type the design phase may be skipped.
