II.1.4) Short description

Gasunie together with the Port of Rotterdam are jointly preparing a district heating connection between the existing pipeline “Leiding over Noord” in Vlaardingen and the Uniper power station facility at De Constant Rebecqueplein (CR plein) in The Hague, The Netherlands. This pipeline will fall under the banner WarmtelinQ. WarmtelinQ will transport hot water (118°C) from the heat suppliers to the several heat transfer stations (Dutch: Warmteoverdracht stations). Here the heat will be transferred to connected district distribution grids via plate heat exchangers. After heat transfer, cold water (68°C) will be returned to the heat suppliers where the water will be heated up again. For each heat transfer stations at least 2 plate heat exchangers are needed.

II.2.4) Description of the procurement:

(nature and quantity of works, supplies or services or indication of needs and requirements)

The total number of plate heat exchangers needed is estimated to be about 30 pieces from DN100 - DN300.

During phase 1 the heat transfer station CR plein, The Hague will be built. In this phase the following amounts of plate heat exchangers will be required; 2 gasketed plate heat exchangers + 1 in the future.

More plate heat exchangers will be required in future phases of WarmtelinQ when more heat transfer stations will be built.

These numbers/amounts are for information purposes only and do not offer a guarantee for the future. Candidates may not derive any rights from these amounts. Gasunie is not obliged to place actual (further) contracts with the contractors.

II.2.7) Duration of the contract, framework agreement or dynamic purchasing system

Duration in months: 144

This contract is subject to renewal: yes

Description of renewals:

It is important that framework agreements can cover the full duration of the project and that materials do not have to be re-contracted at the end of the project. Since the realization of the WarmtelinQ project may span 10-12 years, a contract duration for the framework agreement of up to 8 years is too short because retendering could mean a break in standardization.

II.2.9) Information about the limits on the number of candidates to be invited

-

II.2.10) Information about variants

Variants will be accepted: no

II.2.11) Information about options

Options: yes

Description of options:

Gasunie intends to conclude a framework contracts with one tenderer. This framework contract has an intended term of four (4) years and optional extension of two (2) times four (4) years.

In addition to the framework contract Gasunie concludes a backup contract with the tenderer ranked second during the tender phase. The backup contract has the function of taking over the contract from the contracted tenderer, if the contracted tenderer is no longer able to meet the obligations arising from the agreed framework contract.

II.2.12) Information about electronic catalogues

SECTION IV: PROCEDURE

IV.1) DESCRIPTION

IV.1.1) Type of procedure

Negotiated procedure with prior call for competition

IV.1.3) Information about a framework agreement or a dynamic purchasing system

The procurement involves the establishment of a framework agreement

Framework agreement with a single operator

In the case of framework agreements, provide justification for any duration exceeding 8 years:

This framework contract has an intended term of four (4) years and optional extension of two (2) times four (4) years.

It is important that framework agreements can cover the full duration of the project and that materials do not have to be re-contracted at the end of the project. Since the realization of the WarmtelinQ project may span 10-12 years, a contract duration for the framework agreement of up to 8 years is too short because retendering could mean a break in standardization.

Therefore, the framework agreements are framed for the above period. The reasoning for this contract duration is that WarmtelinQ is one project that is served by as much standardization as possible. The last extension of 4 years (years 9-12) will only be awarded if at the end of year 8 the planning shows that the realization will be ready at the latest in year 12.

In addition to the framework contract Gasunie concludes a backup contract with the tenderer ranked second during the tender phase. The backup contract has the function of taking over the contract from the contracted tenderer, if the contracted tenderer is no longer able to meet the obligations arising from the agreed framework contract.

IV.1.4) Information about reduction of the number of solutions or tenders during negotiation or dialogue
