II.2.4) Description of the procurement:

(nature and quantity of works, supplies or services or indication of needs and requirements)

The facility has 8 spectrometers (DPX-300, AV-300, AV-400-SB, AV-400-WB, AV-500, AV-600, AV-750, AV-850). The main objective is to provide support for performing liquid state NMR experiments, solid state NMR experiments and micro-coil imaging. Service is also provided to researchers from other institutes within the university, as well as external institutes and companies,

We aim to increase the support level and to take the current NMR facility to a state-of-the-art NMR facility. The console for DPX-300 needs to be upgraded to the current level of technology. This could help all the bachelor's and master's students studying LST, MST and BFW courses offered from Leiden Institute of Chemistry.

The upgraded console would have to support practical NMR work for students for at least 10 years after installation.
