II.1.5) Short description of the contract or purchase(s)

The Netherlands Ministry of Defence needs approximately 66 new UHF Air Traffic Control Radio's (225 - 400 MHz; NATO Band I), because our current radio's have reached their End Life Of Type.

The radio's will be used as last resort radio's that guarantee safe air traffic communication in case the primary system (the Voice Communication System) fails.

The Air Traffic Control Radio's we need, need to function in two different types of locations, and each function is connected to a different lot: Lot A: 54 UHF radio's needed for use in air traffic control towers at our military airports Lot B: 12 manportable UHF radio's needed for use "out of area"-locations For both lots: after delivery, we need at least three (3) years of maintenance. This maintenance will be mostly Depot Level Maintenance (mostly repairs of the radios), and some Intermediate Level Maintenance (ILM). Most ILM as well as Operator Level maintenance (OLM), will be performed by NLMOD personnel.

To minimize non-recurring costs and avoid risks and delays often associated with development programs, the radio's should be military off the shelf (MOTS) or commercial off the shelf (COTS).

The tendering procedure will be conducted as a Restricted Procedure pursuant to the Dutch Defence and Security Procurement Act (ADV).

The procedure will be conducted fully electronically via the Negometrix online tendering platform. Further information regarding the use of Negometrix.
The Selection Guide can be found under 'Questionnaire'.

B: INFORMATION ABOUT LOTS

LOT NO 1: LOT A: 54 UHF RADIO'S FOR USE IN AIR TRAFFIC CONTROL TOWERS

B.1) Short description

Delivery of approximately 54 UHF radio's for use in Air Traffic Control towers and for squadron OPS and their subsequent maintenance for at least 3 years.

This maintenance will be mostly Depot Level Maintenance (mostly repairs of the radios), and some Intermediate Level Maintenance (ILM). Most ILM as well as Operator Level maintenance (OLM), will be performed by NLMOD personnel.

We expect that NLMOD personnel will install the new radio's and discard the old radio's at the various sites, but if for whatever reason this is impossible at one, several or all sites, installation of the new radio's and discarding the old radio's at one, several or all sites has to be performed by the Counterparty.

Please find the Selection Guide under 'Questionnaire' at tender number 198447 (main tender).
