#### II.1.4) Short description

Maastricht University (UM) is known in the Netherlands and abroad for its unique education system: problem-based learning (PGO). More information on UM can be found on the internetsite [www.maastrichtuniversity.nl](http://www.maastrichtuniversity.nl).

At Maastricht University a scaled-down version of the future Einstein Telescope is under construction. This is the ETpathfinder project (<https://www.etpathfinder.eu/>). For this project Maastricht University needs a helium-flow precooling system.

The helium-flow precooling loop will need to provide a supercritical high-pressure helium flow at a temperature of around 6 K which in the main tower is subsequently led through the three heat exchangers. The helium-flow will need to be established in a loop, driven by a circulator pump.
