II.1.4) Short description

Schiphol Nederland BV (hereafter: SNBV) invites organizations to participate in their Electrical Buses Market Consultation.

In recent years, the demand for passenger handling by bus has grown significantly. In order to meet the demand for airside bus transport, Schiphol has its own fleet of 53 buses, as well as a contractor that provides drivers and a contractor that maintains this fleet of buses. The fleet of buses is not large enough to meet demand in full. Early 2025 a total number of 35 buses will reach End of Life (EOL).

Due to the opening of the new A-pier, renovations and increased remote handling of airplanes SNBV will likely need to increase the number of buses significantly. SNBV's ambition is to meet the demand for transportation in a smart, efficient and innovative way. The basic principle here is that this process should contribute to SNBV's ambition for zero emissions by 2030.
