II.1.4) Short description

General description of what we are looking for: The diamond groups at Qutech, primarily Hanson group of TU Delft are looking for a new diamond oven to test new diamond annealing processes. For this they will be working with these small diamond samples under different conditions. The purpose for the oven is to restore the diamond structure through annealing after implantation. This oven will be purely dedicated to diamond. The graphitisation of diamond is still an ongoing issue for diamond and this oven will be used to research prevention of this effect. The system will be operated by students primarily. More varied controls and maxima/minima are preferred as this will be a research system.
