II.2.4) Description of the procurement:

(nature and quantity of works, supplies or services or indication of needs and requirements)

TenneT aims to realize and maintain several 2GW connections for the supply of electricity in the Netherlands and Germany. The scope includes 525 kV cable connections, e.g. between offshore DC platforms and land stations, between land stations, for Multi-Purpose Interconnector (MPI) projects and between offshore platforms.

Each Offshore Grid Connection System receives up to 2GW of 66kV (or higher) electricity generated by offshore windfarms, which must be converted offshore from AC to DC. Via 525 kV cables the DC power is transported to shore, where the DC is to be converted back to AC to enable transportation on the AC onshore grid.

The scope covers projects in the Netherlands and Germany offshore, nearshore, inshore and onshore. The scope of this Qualification System may include the following activities: design, engineering, production, transportation, delivery, assembly, supervision of cable laying, testing, installation and commissioning of 525 kV DC cable systems.

II.2.5) Award criteria

Price is not the only award criterion and all criteria are stated only in the procurement documents

VI.4.3) Review procedure

Precise information on deadline(s) for review procedures:

Candidate will be informed of the provisional qualification decision at the earliest possible opportunity. If Candidates object to the provisional qualification decision, they must make their objections known to TenneT within 10 (twenty) days of the day after the day the decision has been sent via Negometrix of the provisional qualification decision by serving an application for interim measures before the competent preliminary injunctions court at Arnhem. If a Candidate initiates legal proceedings in connection with the provisional qualification decision after these 10 days, TenneT will adopt the position that the Candidate has inadmissible claims. This period must therefore be regarded as a time limit.
