II.1.4) Short description

The scope and object of the contract is the delivery of:

Lot 1: Approximately 10.000 pieces of Copper-Copper sulfate Permanent Reference Electrodes.

Lot 2: Approximately 10.000 pieces of Zinc-Zinc oxide Permanent Reference Electrodes.

In 2023, the OTW-L department wants to measure and monitor the Cathodic Protection (CP) of the Gasunie pipelines remotely. A pilot has shown that the remote measurement and monitoring of the CP potentials can be provided via a solution based on the Internet of Things (IoT) principle. In the desired situation, the CP potentials are measured by the IoT module in relation to a permanent reference electrode. These are placed in the field with the intention of carrying out almost no physical checks there. In order to be able to check the permanent reference cell, a second reference electrode will have to be installed.
