Market consultation PDF software package

Referentienummer: -

II.1.2) CPV-code(s)

Hoofdcategorie:

72000000 - IT-diensten: adviezen, softwareontwikkeling, internet en ondersteuning

Subcategorie:

-

II.1.3) Type opdracht

Diensten

II.1.4) Korte beschrijving

The Netherlands' Cadastre, Land Registry and Mapping Agency - in short Kadaster - collects and registers administrative and spatial data on property and the rights involved. This also goes for ships, aircraft and telecom networks. Doing so, Kadaster protects legal certainty. We are also responsible for national mapping and maintenance of the national reference coordinate system. Furthermore, we are an advisory body for land-use issues and national spatial data infrastructures.

For more information about Kadaster we refer to the website of Kadaster <http://www.kadaster.nl/>.

II.1.5) Geraamde totale waarde

Waarde zonder btw: - Munt: -

II.1.6) Inlichtingen over percelen

Verdeling in percelen: neen

II.2) BESCHRIJVING

II.2.1) Benaming

-

Perceel nr.: -

II.2.2) Aanvullende CPV-code(s)

Hoofdcategorie:

72000000 - IT-diensten: adviezen, softwareontwikkeling, internet en ondersteuning

Subcategorie:

-

II.2.3) Plaats van uitvoering

NUTS-code:

NL NEDERLAND

Voornaamste plaats van uitvoering:

-

II.2.4) Beschrijving van de aanbesteding:

(aard en omvang van de werken, leveringen of diensten, of vermelding van de behoeften en vereisten)

Kadaster is currently focusing on extending the current pdf-functionality in order to improve the quality of the legal pdf-documents stored in the Public Registers of The Netherlands Archive. Different customers (civil-law notaries, local authorities, businesses, financial institutions and private individuals) sign pdf-documents which are send to Kadaster. All signed pdf-documents which are received by Kadaster are validated. The PDF documents that pass the validation rules are accepted and stored in the Public Registers of The Netherlands Archive. When PDF-document does not pass the validation rules the customer will be informed about the reasons why the document is rejected. This validation is currently implemented with open source PDF software.

Kadaster is planning to improve the quality of the current implemented PDF validation controls. PDF-documents are validated by Kadaster software based on the following business rules:

- Het Kadaster Public Registers of The Netherlands Archive has to comply to the government standards (<https://www.forumstandaardisatie.nl/open-standaarden/pdf-nen-iso>). That is why the accepted pdf -documents has to be compliant PDF ISO 19500-2 (PDF/A -2) /19500-3 (PDF/A-3).

- The pdf-documents are signed that is why pdf-documents must be also compliant business Kadaster pdf-requirements: PDF 1.7 version and ISO 32000-1. In accordance with ETSI requirements signatures profile PAdES (B-LT/LTA), PDF 1.7 version and ISO 32000-1 provides a framework for digitally signing documents. An important advantage of a complete implementation of PDF 1.7 ISO 32000-1 is to improve the quality of the Public Registers of The Netherlands Archive in the future, but also reduce the chance on issues during the validation of the digital signatures in different PDF readers.

- Kadaster has to comply to European privacy regulation. That is why Kadaster wants to be able to search on text in the archived pdf-documents. This is necessary in order to be able automatically to search/ detect person private/ secret information during the process of the registration of the documents. That is why it is important that the PDF files will be searchable by extracting the text with OCR.

This PDF functionality is currently implemented with open source PDF software. However Kadaster is experiencing limitations in current PDF functionality and is planning to improve the functional quality of this software.

II.2.14) Nadere inlichtingen:

-

II.3) VERMOEDELIJKE DATUM VAN DE BEKENDMAKING VAN DE AANKONDIGING VAN EEN OPDRACHT

25/11/2022
