SECTION II: OBJECT

II.1) SCOPE OF THE PROCUREMENT

II.1.1) Title

Marketconsultation Plagiarism detection software

Reference number: 10789

II.1.2) CPV code(s)

Main code:

72000000 - IT-diensten: adviezen, softwareontwikkeling, internet en ondersteuning

Supplementary code:

-

II.1.3) Type of contract

Services

II.1.4) Short description

In March 2021 a European procedure has been performed for plagiarism detection software for student work. Due to the acquisition of our current software company, the operation and maintenance of the awarded software is not being sufficiently supported anymore. To ensure academic integrity it is of utmost importance that plagiarism detection for student work can continue, by means of well-maintained and supported software that adheres to TU Delft's requirements for plagiarism detection.

II.1.5) Estimated total value

Value excluding VAT: - Currency: -

II.1.6) Information about lots

This contract is divided into lots: no

II.2) DESCRIPTION

II.2.1) Title

-

Lot No: -

II.2.2) Additional CPV code(s)

-

II.2.3) Place of performance

NUTS code:

NL NEDERLAND

Main site or place of performance:

-

II.2.4) Description of the procurement:

(nature and quantity of works, supplies or services or indication of needs and requirements)

Academic integrity has always been a priority for TU Delft and therefore it performs a plagiarism check on all submitted bachelor and master theses. In addition, other writing assignments within various programmes are checked for plagiarism, whether or not as part of the education relating to academic skills. The current plagiarism detection software is a SaaS solution and is linked to the CLE Brightspace via an LTI link. At TU Delft, plagiarism checks for student work are performed only within Brightspace. Teaching staff members have the option in their Brightspace courses to switch on plagiarism detection for the assignments they prepare. When the plagiarism detection is activated, a plagiarism report is created of each submitted student work in that course. The teaching staff member then uses this plagiarism report to assess whether the student has committed plagiarism or fraud. The plagiarism detection software searches public sources, academic sources and a database of previously submitted student works at TU Delft.

II.2.14) Additional information:

-

25/12/2022

[I. II. IV. VI.](#)

II.3) ESTIMATED DATE OF PUBLICATION OF CONTRACT NOTICE

01/03/2023
