
Nota van inlichtingen A01.001.2022 Strengthening the Capacity of 14 Regional Referral Hospitals in Uganda

Aanbesteding: A01.001.2022 Strengthening the Capacity of 14 Regional Referral Hospitals in Uganda
Aanbestedende Dienst: Invest International Public Programmes B.V.
Referentie: A01.001.2022

Toelichting:

Ref.nr. 9
Onderwerp: Requested Qualification HVAC Engineer

Vraag:

The requested qualification for the Heating Ventilation and Air Conditioning Engineer position, i.e. a "University Degree in Electrical Engineering" is not a typical qualification for this job. Instead, a degree in Mechanical Engineering would be required to carry out this position. Therefore, it will be very difficult/ impossible to provide a CV that fits the current requirements.

Antwoord:

The qualification for the Heating Ventilation and Air Conditioning Engineer position, will be adjusted from a "University Degree in Electrical Engineering" to "a degree in Mechanical Engineering".
