II.1.4) Short description

In 2030, TU Delft wants to operate fully sustainably. All activities on and from the campus will then be climate neutral, circular, climate adaptive and contribute to the quality of life of users and nature.

On-campus energy consumption is the second largest factor in TU Delft's CO2 emissions. In the near future, the energy system must be net emission-free, fueled by renewable sources. By means of this market consultation, the Energy Systems team wishes to invite expert and innovative Dutch and international market parties to participate in the preparation of the optimal call for tender for the "Purchasing of energy" tender.
