II.1.4) Short description

The Netherlands Enterprise Agency (RVO) is responsible for the site characterization of Dutch offshore wind energy projects.

These works consist of the execution of three metocean campaigns at three offshore wind energy search areas, which will be further specified. The data for each site are obtained by means of two individual floating LiDAR systems and one spare to measure wind, wave and current properties. Preferably the systems will be in the commercial stage (3) of the OWA Roadmap for commercial acceptance of floating LiDAR technologies.

The tender is divided into three (3) lots; one lot for every metocean campaign. Companies can submit an offer for one or multiple lot(s). The preferred starting date for Lot 1 is Q4 2022, and the preferred starting date for Lot 2 and Lot 3 is Q1 2023.

II.1.5) Estimated total value

Value excluding VAT: - Currency: -

II.1.6) Information about lots

This contract is divided into lots: yes

Tenders may be submitted for: all lots

II.2) DESCRIPTION

II.2.1) Title

Supply of Metocean data lot 1

Lot No: 1

II.2.2) Additional CPV code(s)

Duration in months: 24

This contract is subject to renewal: no

II.2.10) Information about variants

Variants will be accepted: no

II.2.11) Information about options

Options: yes

Description of options:

The following two scenarios may take place:

a) Measuring campaign goals are sufficiently met (sufficient data have been collected) after 12 months of consecutive measurements at one or two or three of the measurement campaigns and;

b) priorities are redefined for measuring campaigns in different Wind Farm Zones or Search Areas due to the adaptation of the 'add on roadmap' (see section 1.2)

In case that one (or both) of these scenario's occur, a relocation to a nearby ('new') location, either within the cluster itself or between different clusters as part of the Dutch Offshore Wind Farm Zones Investigation Area is anticipated. The Contracting Authority will notify

the Contractor two months in advance at a minimum. It is possible that after relocation a 24 months measurement campaign at the new location is required. gtrfgtf
