

**Second Memorandum of Information Tender Document 'the Supply of Metocean data at three locations in the Dutch Offshore Wind Farm Zones' with reference 202202039-41**

Date of publication May 3, 2022

In this Memorandum of Information, the department inviting tenders provides answers to the questions asked and remarks posted in the context of the above-mentioned Tender Document. This Memorandum of Information forms an integral part of the Tender Document.

Remarks:

| Ref. nr. | Question                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | Answer                                                                                                                                                                                                                                                                                         |

| 1        | We get an error message when trying to open the file "VSA_20220331MWMH_RVO_onderzoeksgebied_metocean.mpk" in ArcGis. Could you please check/confirm that the file is not corrupted? And could you please indicate what kind of information is shared in this file?                                                                                                                                                                                                                                                                                  | RVO can confirm that the provided MPK file was indeed corrupted. A fully functional MPK file has now been uploaded to TenderNed. This file provides basic spatial information relevant to the assignment, such as the Investigation Area and the position of Wind Farm Zones and Search Areas. |
| 2        | In the review of the information and the tender portal, it is noted that in the Beantwoord de eisen space there are no requirements specified to respond (enclosed screen captures). From previous submissions for similar tender requirements, the ESDP document and the other requirements specified in 7.3.15 of the Tender Document, used to be uploaded in Beantwoord de eisen. Since this is not possible in this page for this tender, should we upload those documents/information under voeg overige documenten toe (Add other documents)? | Yes, it is allowed to add the documents in TenderNed to 'Beantwoord de gunningscriteria' (Answer the award criteria') or 'Voeg overige documenten toe' (Add other documents).                                                                                                                  |
| 3        | We just checked everything, but it seems the draft contract is missing from the upload. Could you still provide this?                                                                                                                                                                                                                                                                                                                                                                                                                               | Due to a technical error, the draft agreement was not published on TenderNed. The draft agreement is also published with this second memorandum of information.                                                                                                                                |
