VII.1.4) Description of the procurement

The timely delivery and temporary storage of insulated materials (max. three suppliers). These materials in diameters vary from DN300 - DN700.

Additional services and supplies are directly related to the original contract. Change of contractor is not possible for technical and economic reasons (logistics, execution, planning) and would lead to significant inconvenience and cost increases. LdM CV therefore intends to have the following deliveries performed by the supplier:

- Over 800 m additional DN 300 - DN 700 pipe;
- Approximately 65 additional bends DN300 - DN700;
- 2 valves;
- 13 vent points;
- Other items such as shrink sleeves, weld bottoms, end caps.

If an economic operator does not agree with the proposed award, he must object within 20 calendar days from the date of dispatch of this notice, by service of an interlocutory writ at the address of the contracting entity. If this period is exceeded without summary proceedings having been commenced, any right to do so shall lapse and the contracting entity shall be free to proceed to the final award.

VII.1.5) Duration of the contract, framework agreement, dynamic purchasing system or concession

Duration in months: 48

VII.2) INFORMATION ABOUT MODIFICATIONS

VII.2.1) Description of the modifications

Nature and extent of the modifications (with indication of possible earlier changes to the contract):

LdM CV has tendered the supply of the insulated pipeline materials for the Vlaardingen - The Hague Heat Transport Pipeline. From the time of the award until today, due to various causes

and advancing insight, additional services and supplies have become necessary that were not included in the original tender documents, such as:

- Geopolitics: Due to the outbreak of war in Ukraine, and subsequent crises (including energy), delays have occurred. As a result, additional costs were incurred for storage.
- Changes in execution/realization: Due to unforeseen circumstances, WLQ had to make design changes to make/maintain execution possible.
- A hydraulic separation (station) is necessary at the connection of WLQ to the Pipeline across North, resulting in the need for other equipment to connect this station to the network.
- Additional provisions required for commissioning/commissioning of the WLQ network.
- Omissions in the specifications have been corrected.

VII.2.2) Reasons for modification

Need for additional works, services or supplies by the original contractor/concessionaire (Art. 43(1)(b) of Directive 2014/23/EU, Art. 72(1)(b) of Directive 2014/24/EU, Art. 89(1)(b) of Directive 2014/25/EU)

Description of the economic or technical reasons and the inconvenience or duplication of cost preventing a change of contractor:

Change of contractor is not possible for technical and economic reasons (logistics, execution, planning) and would lead to significant inconvenience and cost increases.

VII.2.3) Increase in price

Updated total contract value before the modifications (taking into account possible earlier contract modifications and price adaptations and, in the case of Directive 2014/23/EU, average inflation in the Member State concerned)

Value excluding VAT: 24 024 820,00 Currency: EUR

Total contract value after the modifications

Value excluding VAT: 26 250 000,00 Currency: EUR
