

Notification: Market orientation regarding a database containing information on renewable energy

Organisation: The Netherlands Enterprise Agency

The Netherlands Enterprise Agency (in Dutch: Rijksdienst voor Ondernemend Nederland, RVO) encourages entrepreneurs in sustainable, agrarian, innovative and international business. It helps with grants, finding business partners, know-how and compliance with laws and regulations.

The aim is to improve opportunities for entrepreneurs and strengthen their position. The Agency works at the instigation of ministries and the European Union.

RVO focuses on providing services to entrepreneurs. It aims to make it easier to do business using smart organisation and digital communication. The Agency works in The Netherlands and abroad with governments, knowledge centres, international organisations and countless other partners.

More information about RVO can be found on: www.rvo.nl and <http://english.rvo.nl>.

Knowledge Team Competitive and Sustainable Energy Sectors

The knowledge team 'Competitive and Sustainable Energy Sectors' supports various energy sectors: ranging from established energy companies engaged in electricity production and oil companies to newcomers on the market offering new, partially decentralized forms of energy. The services from this team range from facilitating the development and deployment of renewable energy to energy research. Competitive and Sustainable Energy Sectors supplies knowledge for programmes like Stimulation of Renewable Energy Production (SDE+), Energy Investment Rebate (EIA) and Research and Development Tax Credit (WBSO).

Purpose of the market orientation

RVO Knowledge Team Competitive and Sustainable Energy Sectors wishes to acquire information about renewable energy markets worldwide which is available in databases.

The purpose of this market orientation is to determine whether there are suppliers who are able to deliver and willing to submit a proposal concerning a subscription to a database containing information on renewable energy worldwide.

Extent and duration

A subscription to the database would run for 1 year (12 months), with possible extension. The subscription would be used by (at least) 3 users.

General objective

RVO wishes to use the database for research, data, and news on clean energy, energy smart technologies, and environmental commodity markets.

Description of the product

The database has to cover the most extensive range of renewable energy sectors but also in the existing energy sources, that include the following markets

- Wind Sector
- Solar Sector
- Gas Sector
- Power Sector
- Carbon Markets
- Advanced Transport
- Biofuels coverage
- Electrified Transport
- Advanced Transport Infrastructure deployment
- Natural Gas Vehicles
- Energy Efficiency
- Energy Storage
- Smart Grid
- Coal sector
- Oil

The data base has to cover at least the following continents

- Europe
- Middle east
- Africa

The data base has the contain features regarding the transitions for a sustainable future in the sectors mentioned below

- Clean power
- Transport
- Building & Industry
- Agriculture

The database should contain features like:

- News: Industry and policy news with daily updates on developments
- Analyst reactions and market/ sector outlooks.
- Policy database and country profiles
- Project database and asset maps
- League tables by category, region, size and financing type
- Transaction and financing database (data sets on asset finance, M&A, venture capital, private equity and public markets transactions.)
- Asset valuation tools and models (Information and detailed forecasts on costs, prices, performance and key product differentiators)
- Web platform that provides a portal to all research, news and data services.
- Networking and events (about renewable energy, power, carbon markets and energy smart technologies for the industry's decision-makers, congresses, webinars, courses etc.)

The information should be up to date and updated regularly.

The database is in English.

The provider of the database should (on demand) perform specific analyses. RVO wants to have the opportunity to discuss the results of the analyses with the analyst(s). The making of the analyses and the opportunity to discuss the results with the analyst will take place no more than 7 times during the contract.

Application

Market players who are interested and confident to meet the above requirements are invited to show their interest to the Procurement Office of the Netherlands Enterprise Agency at the latest on May 8, 2023, by email to iucezteam1@rvo.nl with reference to database containing information on renewable energy '202303107'.

Depending on the outcome of this market orientation, we will decide which correct procedure to follow regarding the procurement.
