

ROADMAP SUSTAINABILITY DIFFER

MAY 2021

Goals 2030 and intermediate goals 2025

Ambition: climate neutral in 2030

Energy

Mobility

Waste & Circularity

Behaviour

Procurement

Catering

2030

New experiments are designed in the most energy-efficient and sustainable way.

Reduce the environmental from business trips with 50%

No more residual waste

Sustainability is a standard part of thought processes

Maximum sustainable score is a requirement for facility purchasing processes

100% local and organic catering

All DIFFER employees are very conscious of building-related energy use

Commuting travel is climate neutral

Ecological impact is included as standard in (investment) decision

standard vegetarian / vegan catering

2025

Optimal green energy supply

Fewer business trips because of sustainable travel policy

Electronic waste is processed responsibly.

DIFFER employees are aware of their ecological footprint

Clustered purchasing and delivery processes

75% local and organic catering

Submetering of the important energy flows

Organize meetings more online and in a clustered way

A good and simple system for waste separation

Sustainability standard chapter in reporting

Conscious choice for vegetarian
