1. Introduction

This document "Template Certificate of Acceptance" is part of the Descriptive Document pertaining to 'Acquisition and 3rd line Maintenance of Present Weather Sensors', reference no. TN-349307 dated January 20th, 2023.

This document gives an example of the certificate that is issued after a acceptance of each individual sensor by KNMI. This delivery acceptance is described in Annex 10 "Verification Phase and Delivery" section 4.2.

The calibration certificate and the FAT of the sensor will be added to this certificate. Herewith there will be no misunderstandings about which sensor it is and what the results were from the acceptance tests.

In addition to the warranty period that starts after signing the certificate, this is also an approval for the payment as described in Annex 10 "Verification Phase and Delivery" section 4.3.
