1. Buyer

1.1 Buyer

Official name: [N.V. Nederlandse Gasunie] ---

Legal type of the buyer: Public undertaking

Activity of the contracting entity: Production, transport or distribution of gas or heat

2. Procedure

2.1 Procedure

Title: Leak Detection and Repair

Description: Gasunie has set up an LDAR programme for its assets, which aims to detect unintended methane emissions, repair them and thus reduce them. The contract with the current service provider is due to expire, and Gasunie wants the new contract to do justice to the new legislation that is currently being drawn up. Gasunie intends to enter into a new contract for all measurements of fugitive emissions and leakage losses through a Leak Detection and Repair (LDAR) programme. Prior to the actual tender, Gasunie would like to test developments in the market. A dialogue document is available via e-mail j.draijer@gasunie.nl - +/- 575.000 potential leakage sources - Inspection programme based on the latest state of the new methane regulation: • 4-monthly measurement (above-ground sources) of 100% of the total population: Minimum detectable leakage limit of 1g/hr CH₄. • 2-monthly screening above-ground sources with minimum detectable leakage limit of 17g/hr CH₄. • 5-monthly screening underground sources with minimum detectable leakage limit of 5g/hr CH₄. (e.g. underground valve schemes)

2.1.1 Purpose

Nature of the contract: Services

Main classification 90715000 Pollution investigation services (cpv):

2.1.2 Place of performance

Country: Netherlands

Anywhere in the given country

2.1.4 General information

Legal basis:

Directive 2014/25/EU

3. Part

3.1 Part:PAR-0000
