1. Buyer

1.1 Buyer

Official name: N.V. Nederlandse Gasunie

Legal type of the buyer: Public undertaking

Activity of the contracting entity: Production, transport or distribution of gas or heat

2. Procedure

2.1 Procedure

Title: Softwareservices for Heat transport, capacity planning and simulation

Description: The scope of this tender includes the purchase of services that are used for capacity calculations and simulation(s) of heat networks. The purchase includes the licensing, implementation, support and training of the users of the software. Preference is given to a SaaS solution. The core service consists of capacity calculations, making a heat transport plan (set points of all installations), near real-time simulation for places where no measurements are available, forecasting the process conditions of the network, and giving advice (new set points) in case of deviations in the network and maintenance of the simulation model. For this Gasunie wants to select a supplier that can supply the licenses for the services with the desired functionalities and that will take care of the implementation and configuration of the services. We prefer a solution that can deliver by default as much functionality as possible and for which no software development is required. For further information se See tender documents

Procedure identifier: 2632343b-7193-493a-b15e-cab2e8ad8b93

Internal identifier: WS4067228754

Type of procedure: Open

The procedure is accelerated: No

Main features of the procedure: The scope of this tender includes the purchase of services that are used for capacity calculations and simulation(s) of heat networks. The purchase includes the licensing, implementation, support and training of the users of the software. Preference is given to a SaaS solution. The core service consists of capacity calculations, making a heat transport plan (set points of all installations), near real-time simulation for places where no measurements are available, forecasting the process conditions of the network, and giving advice (new set points) in case of deviations in the network and maintenance of the simulation model. For this Gasunie wants to select a supplier that can supply the licenses for the services with the desired functionalities and that will take care of the implementation and configuration of the services. We prefer a solution that can deliver by default as much functionality as possible and for which no software development is required. For further information see the documents in Ariba.

2.1.1 Purpose

Nature of the contract: Services

Main classification(72212150Industrial control software development services cpv):

Additional classification(48462000Mathematical or forecasting software package cpv):

2.1.2 Place of performance

Country: Netherlands

Anywhere in the given country

2.1.4 General information

Legal basis:

Directive 2014/25/EU

5. Lot
