

Memorandum of Information (second round)
For the public European tender procedure New generation wind sensore and 3rd line
maintenance - 3D sonic heated wind sensors (TN-463889)

For the public European tender procedure New generation wind sensore and 3rd line maintenance - 3D sonic heated wind sensors (TN-463889)

Tenderer is asked to submit questions with the use of this question form.

Instruction of use:

Column A states the question number.

Column B states the document that the question regards, and if possible, please also state the paragraph.

Column C states the question.

Question number	Document	Question	Answers
1	Memorandum of Information (first round)	The document name of the Memorandum of Information (first round) is not correct. The correct document name should be Memorandum of Information first round - reference TN-463889 instead of Memorandum of Information second round - reference TN-463889. The Contracting Authority has placed the Memorandum of Information first round with the correct document name, Memorandum of Information first round - reference TN-463889, in TenderNed now. Please note that the content is the same.	
2	Memorandum of Information (first round), question 18	The contracting authority has the following additional (revised) information for the answer concerning question 18 in the Memorandum of Information (first round): The consequence if a threshold for a desirable requirement is not met is as follows: # 103 is classified as a desirable requirement. In the absence of allocated points, there will be no direct consequences for not meeting the threshold. If points are assigned to the desirable criteria, remedial actions will be required to maintain performance. And penalties (or partial) termination of the agreement can be consequences too.
