

e. Debug (voorbeeld uit een andere applicatie), (vastleggen code / vraagstelling die door de processor verwerkt wordt om te kunnen analyseren)

f.

The screenshot shows a software application interface. At the top, there is a menu bar with the following items: 'Systeem', 'Verwerking', 'Plug-ins', 'Visualisaties', 'Instellingen', 'Venster', and 'Help'. The 'Verwerking' menu is open, showing a list of options: 'Gebruikersinstellingen ledigen', 'Gegevens samenvoegen', 'Oude gegevens verwijderen', 'Gegevens anonimiseren', and 'Applicatie loggings'. The 'Applicatie loggings' option is highlighted. Below the menu, there is a window titled 'Logging traceren'. This window contains a table with three columns: '#', 'Time', and 'Message'. The table lists various system events, including loading and execution of different forms (TraceForm, GridForm) and SQL queries. The messages are timestamped and include details about the execution context, such as 'ElapsedMs', 'GdiCnt', and 'UserCnt'.

#	Time	Message
