Legal type of the buyer: Central government authority

Legal type of the competent authority: Central government authority

Activity of the contracting authority: Housing and community amenities

2. Procedure

2.1 Procedure

Title: Digitalisation Inland Ports

Description: The market consultation concerns the 'Digitization of Inland Ports' program (shore power, port dues collection & berth management), in which the concept of federated data sharing is being tested to create a new framework for authentication and authorization. The objective is to develop a secure, reliable, and open data ecosystem for inland ports as a digital hub and to improve user convenience for skippers. The focus lies on a standardized and scalable system, with sufficient privacy safeguards and opportunities for market competition. The market consultation seeks input for the next phase of the program. The effort is estimated at several person-weeks of work. The maximum available budget is €100,000, to be distributed among multiple parties. The stated amount is an estimate and no rights can be derived from it. We see this program as a stepping stone toward a broader rollout in the Netherlands.

2.1.1 Purpose

Main nature of the contract: Services

Main classification (cpv): 79000000 Business services: law, marketing, consulting, recruitment, printing and security

Additional classification (cpv): 31730000 Electrotechnical equipment

Additional classification (cpv): 63720000 Support services for water transport

Additional classification (cpv): 72000000 IT services: consulting, software development, Internet and support
