1.1 Buyer

Official name: N.V. Nederlandse Gasunie

Legal type of the buyer: Public undertaking

Legal type of the competent authority: Public undertaking

The buyer is a contracting entity

Activity of the contracting entity: Production, transport or distribution of gas or heat

2. Procedure

2.1 Procedure

Title: Market Enquiry HyStock for the Tender of Cushion Gas First Cavern

Description: Please note: the market consultation documents can be requested by e-mail at annelieke.van.engelenhoven@gasunie.nl The Netherlands is committed to achieving net-zero CO₂ emissions by 2050. Renewable and low-carbon hydrogen will play a pivotal role in this transition. To accommodate fluctuations in hydrogen supply and demand, large-scale hydrogen storage infrastructure is essential. Hystock, a subsidiary of Gasunie, is developing four salt caverns for hydrogen storage at Zuidwending in the northern Netherlands. The first cavern has already been leached and is scheduled to be operational in 2031, with the others to follow in line with market developments. The first cavern requires 7 kilotons (kt) of hydrogen as cushion gas and 6 to 8 kt filling gas for debrining. This market enquiry has been initiated to align the procurement of this hydrogen with market developments. For the delivery of hydrogen parties need to be connected to the hydrogen backbone. Hystock needs a volume of 15 Kton of hydrogen, as cushion gas and for its debrining proces, delivered to the Zuidwending Cavern via the yet to be built backbone

2.1.1 Purpose

Main nature of the contract: Supplies

Main classification (cpv): 24111600 Hydrogen

2.1.2 Place of performance

Country: Netherlands

Anywhere in the given country

Additional information: The delivery shall take place through the backbone. Hence parties need to be connected to the backbone between 2030 and 2032 to deliver hydrogen to the caverns of Hystock

2.1.4 General information

Legal basis:

Other

5. Lot

5.1 Lot technical ID: LOT-0000
