this notice:

400 000 Euro

Direct award:

Justification

for direct
award:

Service contract awarded on the basis of an exclusive right

Other
justification:

This announcement is only used to announce the intended procedural choice to the market in advance in order to give interested parties the opportunity to make any objections known. If interested parties, despite the motivation, wish to object to the intention, they must submit a reasoned objection to the continuation of this procedure no later than July 1, 12:00 noon CET. To do so, you can contact Geurt Visser via g.visser@uu.nl. Utrecht University will take any objection into account in its consideration. If, despite our explanation/response to your questions or objections, you cannot agree with this announcement, you can initiate summary proceedings with the Midden-Nederland District Court in Utrecht. You must do so before July 1, 2025, 12:00 noon CET. If no objection is made known within this period, the rights of companies to object to the intended procedure will lapse. Justification for Direct Award: Following a market analysis, Utrecht University has determined that only one supplier can deliver the implants that meets the specific functional and technical requirements. The intended direct award is based on Article 2.32 paragraph 1 sub b of the Dutch Procurement Act 2012 (technical reasons – absence of competition for technical reasons). Utrecht University has the intent to acquire Kyon implants for total hip prosthesis surgery for the dept. of Clinical Sciences, faculty of Veterinary medicine. The total hip implants need to be suitable for veterinary patients of all sizes (small cats to large dogs), with solutions for high luxation risk patients and options for revision surgeries. The system needs to be cementless, promote rapid bone ingrowth and able to withstand immediate loading. Technical requirements The combination of the below mentioned implant characteristics of the Kyon Zurich Cementless total hip replacement implants make them unique for our veterinary patients: - Modular system with wide range of sizes and Dual Mobility system for high luxation risk patients - Cementless system, reducing the risk of infection - Immediate fixation of the stem through locking screw technology - Ceramic heads – known for its extreme hardness, toughness and biocompatibility - Titanium and titanium alloy materials for supreme biocompatibility and reduced risk of infection - Wear reducing geometry of the cup - Porous titanium and hydroxyapatite coating of the stem and cup for rapid bone integration.
