

Functieomschrijving

Highlights

- You implement and maintain the cloud network infrastructure for our various services and the 'security platform'
- You work within an agile organization according to the scrum method
- You work with the latest tools and techniques in the field of cloud infrastructure, networks, security, observability

Description of your professional mission

Portbase plays an independent and crucial role in port logistics. With the increasingly important role that data plays, Portbase is always on the move to unlock these (international) data flows safely and as optimally as possible for its customers and partners.

Together with the team, you are responsible as an Cloud Network Engineer for implementing, optimizing and managing a connectivity hub that links all traffic with the security platform, inspects and processes the traffic with the best possible customer experience.

As an Cloud Network Engineer, you recognize yourself in the Portbase values of leadership, collaboration and progress. You give substance to this by communicating ideas and directions within the organization by participating in the various guilds and designing, testing and implementing the best solutions together with architects and security engineers.

Vereisten

We are looking for you if you can enrich us with

- Experience and affinity with cloud networking & security, this does not necessarily have to be through prior education, but can also be gained through work experience.
- Analytical thinking skills to be able to analyze problems with a focus on connectivity, traffic flows and security.
- Interest in the complex (logistics) domains of Portbase.

- Experience with cloud infrastructure. Preferably AWS and services such as VPCs, Transit Gateways.
- Experience with Infrastructure as Code (Terraform).
- Experience in the network edge & perimeter. Preferably Cloudflare and technologies such as WAF, DNS.
- Experience in an Agile/Scrum environment.
- Knowledge of OpenTelemetry, New Relic & OpsGenie is a plus.

What Portbase has to offer you

- An office within walking distance of Station Blaak and De Markthal.
- Performance management; ownership of your own development, just like with your code, you are in control, we facilitate.
- Plenty of room for creativity, innovation and personal initiatives. Whether you work with us for a week, a month or a year, we are open to it.
- Unique and pleasant culture; we work together towards a common goal in which we deliver value to the logistics community. You will be able to recognize these values in everything we do, including our collaboration.
- 26 vacation days; and the option to purchase additional days.
- Necessary tools and good secondary conditions; laptop, phone, travel expense reimbursement, good pension scheme, etc.
- A competitive annual salary; including a 13th month.

About Portbase

We operate as both an IT company and as a logistics service provider. We are both and that makes us strong. We understand the market, the players and their interests. We bring parties together, initiate chain agreements and collaborate on solutions that make Dutch ports and their supply chains attractive for companies that want to transport goods across Europe.

We listen carefully to all parties in the logistics chain. From shipping company to terminal, from driver to customs officer: all links in the chain have their own challenge. We therefore work for the entire port community. We help them operate more efficiently and effectively

by simply processing 140 million transactions per year on time through 40 different services.

Keeping things moving

Portbase has been around for 21 years and we are proud of that. What once started with the assignment to digitize paperwork has grown into one of the most progressive Port Community Systems in the world and a connecting factor between all port partners.

In the future, we will continue to take the lead in developing chain-wide digital solutions to make integrated services simpler and safer. If there's one thing we've learned in the past 21 years, it's that we can't stand still. As a port community we are on the move. Literal.

With this vacancy we are recruiting our new colleague ourselves. If we are unable to do this, we will take the step of hiring an agency to help us with this. We therefore do not appreciate acquisition. We are not open to self-employed or temporary employment for this vacancy.
