

Ms. Ellen Kelder
Municipality of Dordrecht
300 Spuiboulevard
6941AA Dordrecht
Nederland (NL)

Lille, 15 December 2023

Dear Ms. Kelder,

Congratulations! Your step 2 application **NWE0200311 Greening dense urban areas for enhanced climate resilience, biodiversity and health (GreenDense)** has been selected for funding by the NWE Monitoring Committee which took place on 21-22 November 2023, in Nantes, France. We kindly ask you to inform your project partners.

The Monitoring Committee has set technical requirements for you to fulfill (annexed to this letter) by **7 February 2024, 12:00 CET (midday)** at the latest to be able to proceed with the signature of the subsidy contract.

If you have not yet submitted your signed partnership agreement, please do so by the set deadline. In case you have already submitted a signed partnership agreement, please verify that it matches the final application form.

An **Approved Projects Seminar** will take place on **14-15 February 2024 in Lille, France**. Please save the date as this seminar is mandatory for all project partners (excluding associated organisations). A maximum of two representatives per project lead partner and one representative per project partner will be invited. These must be persons who will be directly involved in the implementation of the project. Information on registration and the agenda will be sent out shortly.

Please contact your responsible JS officer Matthew Thompson (**matthew@nweurope.eu**), as soon as possible to discuss the technical requirements and the process towards contracting.

Should you have a complaint regarding this decision, you can find more information regarding the available options in Chapter 7 of the Programme Manual.

Kind regards,

David Grzegorzewski

Programme Director

Technical requirements

Project intervention logic

- The benefits of the mosaic approach and its contribution to SO2.7 should be better explained in the application, and the cumulative impact of the project interventions should be outlined.

Workplan

- The project work plan should be revised to ensure that it can be effectively monitored during implementation. The number of project deliverables should be increased to better reflect the activity descriptions, and to ensure that there are intermediate steps to enable better project monitoring.
- The deliverables should ensure that there is sufficient feedback within the proposed time frame between the investments and work plan.
- The project investment descriptions should provide a better explanation to the actions that are to be undertaken in each location.

Communication

- The communication activities, as with the rest of the work plan, should include additional deliverables.

Budget

- The project should better detail their budget by filling in all descriptive fields and link the budget to the work plan

Other

- The Partnership Agreement should be signed, completed, and be based on the final application form. It must be uploaded on the JEMS (Section Application annexes) before the revised application form is submitted through the JEMS.

- Jems Application Form - Section B Project Partners: Missing information must be completed for all project partners:

NUTS 2 code and NUTS 3 code (See NWE Programme Manual and

<https://ec.europa.eu/eurostat/web/nuts/background>);
