

## Revolving board, white enamel steel

- Writing surface of white enamelled steel, fused at 800°C
- Suitable for very intensive and long-term use
- Anodised aluminium frame with plastic corner pieces
- The sturdy white base has a long pen tray and four solid industrial wheels, two of which have brakes
- The rotary knob allows the board to be turned through 360° and to be fixed at any angle
- Magnetic, dry wipe

## Specifications - General, board

|                    |                                         |
