|                                            |                           | 1.1 | Working Method                  | Working Method, Step-by-Step Plan, Management and Maintenance in the Operational Phase:<br>Tenderer writes a step-by-step plan for the phases of design, construction, installation on Zirfaea, testing and maintenance of the FerryBox after commissioning. This approach addresses the requirements in H4 of the PoR and contains information about response times with regard to emergency repairs. This is a general description. The actual maintenance plan is one of the deliverables of this Assignment.       | 400.000                            |                          | = (BC-6)/4 * MK               | This sub-criterion assesses the feasibility and clarity of the action plan submitted by the tenderer.                       |
|                                            |                           |     |                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | 600.000                            |                          | Σsubcriterium                 |                                                                                                                             |
