

Appendix A. FerryBox Zirfaea. Case number 31191766

Pictures situation on board

1 - The FerryBox will be placed approximately 1 meter from the back of the MMC container in the photo.

Appendix A. FerryBox Zirfaea. Case number 31191766

2 - The front MMC container. This will be located at a later stage on the side of the FerryBox, hence a distance of 1 meter so that we can still easily enter the MMC and open the control cabinet.

3 - Fresh water connection. But there are several points from which fresh water can be obtained.

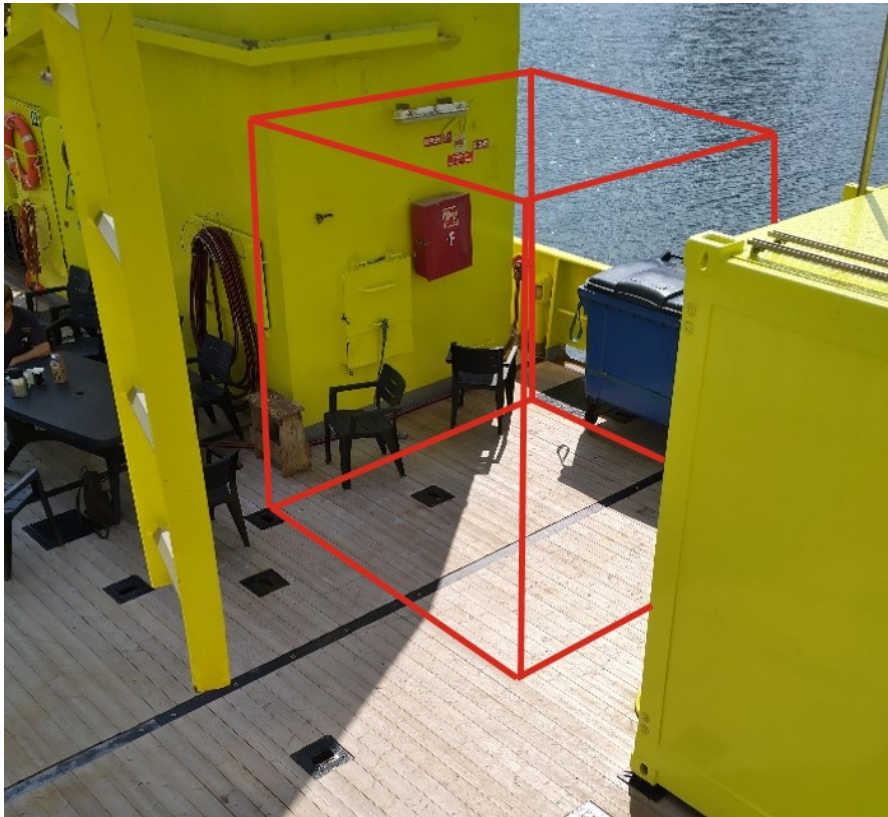

4 - Seawater supply (green flange).

Appendix A. FerryBox Zirfaea. Case number 31191766

5 - Possible 220/380 tapping from MMC.

Appendix A. FerryBox Zirfaea. Case number 31191766

6 - We could also place the FerryBox more towards the chimney. There is a twist lock to secure the FerryBox. Direct fresh water connection and 220/380 directly from the cable duct, so no cables over deck.
