

Appendix B. FerryBox Zirfaea. Case number 31191766

Randapparaturen Pi-10 en CytoSense

We have a stainless steel frame. The frames are for permanent mounting on board (or in a container). That's why we had already ordered two frames anyway, one for Tridens and one for Zirfaea. The Plankton Imager can be removed from the frame. The frame contains pipework, power connection and flow meter.
