2. Procedure

2.1 Procedure

Title: Replacement Magnetometer EODD

Description: The EODD (Explosive Ordnance Disposal Department) conducts ground investigations for UXO's (Unexploded Ordnance) both within the Netherlands and during expeditionary operations. The EODD is responsible for supporting the Armed Forces. The EODD is a joint unit with the Army acting as the Single Service Manager (SSM). The EODD, as a unit, is involved in supporting all types of operations. In these operations there is often a need to locate UXO's. This must be done with a ferrous detector (ground#penetrating detection system) that can detect ferrous metals to a depth of at least 4 metres below the ground surface. This detector must be able to connect to and exchange data with the requested computer#assisted detection equipment and must be GPS#supported. In view of the age and usage of the existing ferrous#detection equipment, it is due for replacement. Moreover, advances in detection techniques make it necessary to replace the current ferrous#detection equipment.

Internal identifier: 6843b28d-1e37-439e-bf4e-5d116adb97a3

2.1.1 Purpose

Main nature of the contract: Supplies

Main classification (cpv): 38546100 Bomb detectors

Additional classification (cpv): 31642000 Electronic detection apparatus

Additional classification (cpv): 31642100 Detection apparatus for metal pipes

Additional classification (cpv): 31642400 Detection apparatus for non-metallic objects

Additional classification (cpv): 35123000 Site-identification equipment

Additional classification (cpv): 38431000 Detection apparatus

Additional classification (cpv): 38546000 Explosives detection system

2.1.2 Place of performance

Country: Netherlands

Anywhere in the given country

Additional information: Zie documentatie

2.1.3 Value

Estimated value excluding VAT: 1 300 000 Euro

2.1.4 General information

Legal basis:

Directive 2009/81/EC

3. Part

3.1 Part technical ID: PAR-0000
