2. Procedure

2.1 Procedure

Title:	Market consultation NMR spectrometer
Description:	The University of Groningen (UG) intends to purchase a benchtop NMR spectrometer and its full integration into Chemspeed SWING robotic platform available at Stratingh Institute for Chemistry with the purpose to analyse and characterize reaction products and intermediates in-situ and feed these results back into AI-driven optimization loop. After careful market research focusing on the requirements, the UG has come to the conclusion that Bruker's Fourier 80 RxnLite is the only technically suitable solution that enables robotic integration, multi-nuclear analysis, and sufficient spectral performance to support the RobotLab's closed-loop, AI-driven research objectives. If there are parties who can meet the requirements mentioned in this document as well, please respond to this market consultation before 28 March 2026. If there are no reactions, the UG will proceed with the purchase of the benchtop NMR system of Bruker without prior publication.
