2. Procedure

2.1 Procedure

Titel:	Programme Integration Manager
Beschrijving:	For the PALLAS Programme we are looking for a Programme Integration Manager. The ideal Programme Integration Manager (PIM) is a structured and analytical leader who thrives in complex programme / infrastructure / construction projects. With a strong eye for relevant detail and an ability to see the bigger picture, he or she ensures alignment across projects while safeguarding the programme baseline. Naturally proactive and solution-oriented, the PIM reports risks and issues early, develops effective mitigation strategies, and drives timely resolution. The Programme Integration Manager (PIM) supports the programme with integrated management across the three main projects (Reactor Project, Operational Readiness and Processing Facilities). The PIM is responsible for continuously analysing progress information from the various elements of the programme, with the aim of proactively generating programme level management information, providing insight into risks, bottlenecks and issues at the interfaces and proposing possible solutions to programme management. This is all translated into monthly and quarterly programme reports. The PIM reports to the Director Integrated Business Services. A skilled communicator and influencer, the PIM builds trust with the Directors of the PALLAS Programme, the managers, and other stakeholders, fostering transparency and collaboration across organisational boundaries. The PIM supports the strategic sessions with the Director?s team. Calm under pressure and resilient in challenging situations, the PIM provides objective and reliable reporting while maintaining focus on strategic objectives. The PIM leads a team which consists of professionals in the areas of Scheduling, Risk Management, Issue Manager and Reporting. Above all, this person combines integrity, discipline, and strategic foresight with the interpersonal skills needed to unite diverse teams and keep the programme on track.The PIM will play a critical role in setting up the foundation for the PIM department. This is a temporary assignment focused on creating robust procedures, governance frameworks, and building a capable team. After the initial setup (estimated 3 months), NRG PALLAS will recruit a permanent PIM who will continue operations under NRG PALLAS payroll. All four of the modelovereenomsten as mentioned in the leidraad are suitable for this assignment.Key Competencies Strategic thinking and programme-level perspective Proactive problem identification and resolution Stakeholder management and collaboration Analytical rigor with attention to detail Leadership and team development Strong organisational and communication skills As per the Programme Management Plan, the responsibility of the Programme Integration Manager is as follows: Developing and maintaining the (real-time) integrated programme-level schedule, risk register, issue register and cost profile within the Programme Baseline and Project Controls framework, building on progress reporting from the individual projects. Proactively identifying potential (interface) risks and issues between projects and with external stakeholders and /or other risks to the Programme Baseline and developing mitigating strategies and action plans to resolve them. Developing the monthly and quarterly integrated programme progress report to the PALLAS Programme Management (Reactor/NHC/OR), building on the progress reports from the projects, as a basis for the Monthly Programme Status Meeting.Leading the programme level issue management process and coordinating issue resolution.Participating in the Joint Delivery Organisation (JDO) Coordination Team for the Reactor Project to facilitate proactive management of interfaces between projects and ensure efficient use of resources.
