Official name : N.V. Nederlandse Gasunie

Legal type of the buyer: Public undertaking

Activity of the contracting entity: Production, transport or distribution of gas or heat

2. Procedure

2.1 Procedure

Title: Shell & tube heat exchangers for gas receiving stations and other locations

Description: Gasunie aims to establish an agreement for the supply of shell-and-tube heat exchangers in accordance with its Technical Standard MSW-02-E and other shell & tube heat exchangers in line with EN-13445. The heat exchangers are critical components within local Gas Receiving Stations (GOS), where they are used to regulate gas pressure and ensure safe and efficient operation of the national gas transmission network. Gasunie operates approximately 1,100 GOS locations, in which a total of around 2,800 shell & tube heat exchangers are installed. These units are procured both for new infrastructure projects and as replacements within maintenance and asset management programs. The estimated value over the full term (initial 4 years plus two extension options of 2 years each) of the framework agreement is EUR 2,500,000.

Internal identifier: WS2767947151

2.1.1 Purpose

Main nature of the contract: Supplies

Main classification (cpv): 42500000 Cooling and ventilation equipment

Additional classification (cpv): 42520000 Ventilation equipment

2.1.2 Place of performance

Country: Netherlands

Anywhere in the given country

2.1.4 General information

Legal basis:

Directive 2014/25/EU

3. Part

3.1 Part technical ID: PAR-0000

Title: Shell & tube heat exchangers

Description: To effectively meet both regular and project specific needs, Gasunie intends to conclude a framework agreement with two suppliers. Under this framework agreement, Gasunie has two award options: directly for regular deliveries and in a mini-competition for specific requests. • Regular Deliveries For the regular supply of shell & tube heat exchangers for gas receiving stations, Gasunie will purchase directly from the number 1 under the framework agreement. • Specific Requests (Mini-Competitions) For project driven or non standard requests—such as those involving special technical, logistical, or engineering requirements—Gasunie will hold a mini-competition between the two suppliers (number 1 and 2). When a specific need arises, a mini-competition will be organised between the two suppliers. The decision on the award will be based on the best price-quality ratio based on predetermined evaluation criteria, such as price, delivery

time, quality, sustainability, technical suitability, and the required degree of customization. The supplier who achieves the best overall score based on these criteria will be selected for the specific request. The estimated value over the full term (initial 4 years plus two extension options of 2 years each) of the framework agreement is EUR 2.500.000.
