2.1 Procedure

Title:	Delivery of femtosecond Ti:sapphire laser systems
Description:	The required system must simultaneously satisfy the following combined set of specifications under operational laboratory conditions: • 7 mJ pulse energy at 1 kHz and approximately 35 fs; • Compatibility with a TOPAS HE OPA accepting up to 8 mJ / 35 fs input pulses; • Upgrade path using the same seed laser to support an additional >7 mJ, 1 kHz, 35 fs amplifier beamline; • Beam pointing stability better than 4 µrad rms; • Pulse energy stability better than 0.4% rms over 24 hours; • TEM00 beam quality with $M^2 < 1.20$ in both axes; • Active compressor stabilization; • Dedicated stabilization of the Ti:sapphire thermal lens; • Guaranteed stable performance over ±5 °C laboratory temperature variation; • Nanosecond pre-pulse contrast better than 2000:1; • Laser design that minimizes spectral distortion of the compressed pulse. 1 femtosecond Ti:sapphire laser system

6. Results

Value of all contracts awarded in this notice:	254 662,89 Euro
Direct award:	
Justification for direct award:	The contract can be provided only by a particular economic operator because of exclusive rights, including intellectual property rights
Other justification:	A market research has been carried out for femtosecond Ti:sapphire laser systems capable of delivering >7 mJ pulse energy, approximately 35 fs pulse duration, and 1 kHz repetition rate, while also meeting the longterm stability, beam quality, pre-pulse contrast, and upgrade requirements. The market assessment showed that several suppliers can provide high-energy femtosecond Ti:sapphire laser systems in the relevant pulse-energy and repetition-rate class. However, the procurement requirement is not only defined by nominal pulse energy. The required system must simultaneously satisfy a combined set of specifications under operational laboratory conditions. Based on the market research, this complete combination of requirements is only met by the Newport Spectra-Physics Solstice APX system released in 2026.
