

Annex 8: Questioning Form

'Seismological Monitoring Instruments for KNMI' (reference: TN-)

This memorandum of information thus becomes an integral part of the request for quotation and the accompanying appendices. In this memorandum of information, the submitted (anonymised) questions are listed together with the answer from the contracting authority.

Questi on nr.	Document	Question	Answer
1		Question: is it mandatory to submit references for each 6ch 12ch and 16ch systems? If yes, and it is not possible to provide all options how does this impact the tender submission?	It is not mandatory to submit references for each individual system. Where a system consists of multiple identical instruments that are interconnected, it is sufficient to provide references for the smallest unit.
2		Als Canadees bedrijf kunnen we geen btw afdragen/betalen. In soortgelijke situaties binnen de EU hebben we een volmacht geregeld tussen de eindklant en onze expediteur. Hierdoor kan de expediteur de douaneaafhandeling verzorgen, en worden de goederen uiteindelijk geleverd; we verzenden echter in feite Incoterm DDP minus btw en de eindklant betaalt de btw. Is die regeling acceptabel? As a Canadian company, we cannot remit/pay VAT. In similar situations within the EU, we have arranged a power of attorney between the end customer and our freight forwarder. This allows the freight forwarder to handle the customs clearance, and the goods are ultimately delivered; however, we are in fact shipping under Incoterm DDP minus VAT, and the end customer pays the VAT. Is this arrangement acceptable?	Zolang de kosten niet bij de Aanbestedende dienst verhaald worden, dan is deze regeling acceptabel. The proposed arrangement is acceptable, provided that the costs are not passed on to the contracting authority.
