1. Buyer

1.1 Buyer

Official name :	Ministerie van Infrastructuur en Waterstaat
Legal type of the buyer:	Central government authority
Activity of the contracting authority:	General public services

2. Procedure

2.1 Procedure

Title:	Seismological Instruments Lot 1 Surface Accelerometer en Lot 2 Dataloggers
Description:	The Royal Netherlands Meteorological Institute (KNMI) is legally mandated to monitor and analyse seismic activity in and around the Netherlands. To fulfil this statutory responsibility, KNMI operates and maintains a nationwide seismic monitoring network consisting of multiple monitoring locations. Each location is equipped with seismological instruments and a data logger that records the measurement data and transmits it to KNMI's servers via a router. KNMI analyses these data to fulfil its legal mandate, and the data are also made publicly available for (scientific) research purposes. To maintain the monitoring network, KNMI requires seismological instruments that perform accurate and consistent seismic measurements and are capable of transmitting data to KNMI. As a contracting authority subject to public procurement legislation, KNMI is required to conduct procurement procedures for the acquisition of these instruments. The objective of this procurement is to contract a supplier f See Descriptive Document
Procedure identifier:	b0deb565-ac89-4323-84bb-21c307ce81a6
Internal identifier:	31216700
Type of procedure:	Open
The procedure is accelerated:	no

2.1.1 Purpose

Main nature of the contract:	Supplies
Main classification (cpv):	38300000 Measuring instruments

2.1.2 Place of performance

Country subdivision (NUTS):	Utrecht (NL350)
Country:	Netherlands
Additional information:	De Bilt

2.1.4 General information

Legal basis:

Directive 2014/24/EU

2.1.5 Terms of procurement

Terms of submission:

Rijksoverheid

Maximum number of lots for which one tenderer can submit tenders:	2
Terms of contract:	
Maximum number of lots for which contracts can be awarded to one tenderer:	1

2.1.6 Grounds for exclusion

Sources of grounds for exclusion:	European Single Procurement Document (ESPD)

5. Lot

5.1 Lot technical ID: LOT-0001

Title:	Seismological Instruments Lot 1 Surface Accelerometer
Description:	The Royal Netherlands Meteorological Institute (KNMI) is legally mandated to monitor and analyse seismic activity in and around the Netherlands. To fulfil this responsibility, KNMI operates a nationwide seismic monitoring network consisting of multiple monitoring stations. Each station is equipped with seismological instrumentation and a data logger that records measurement data and transmits it to KNMI's servers via a router. KNMI analyses these data to meet its statutory obligations, and the data are also made publicly available for (scientific) research. To maintain and operate the monitoring network, KNMI requires reliable seismological instruments that perform accurate and consistent seismic measurements and are capable of delivering data to KNMI. As a contracting authority subject to public procurement legislation, KNMI is required to conduct a procurement procedure for the acquisition of these instruments. The objective of this procurement is to award contracts to one or more suppliers for the supply of seismological monitoring equipment. In addition, the procurement aims to establish an effective long-term relationship between KNMI and the selected supplier(s) for the provision of instruments throughout the duration of the contract. The seismological monitoring network requires measurement equipment for the following purposes: 1. To maintain the operational capability of the existing monitoring network. 2. To expand the existing monitoring network through the installation of new monitoring stations. Scope The scope of this procurement consists of the supply of seismological monitoring equipment, including: • Surface accelerometers with integrated data logger. See Descriptive Document
Internal identifier:	1

5.1.1 Purpose

Main nature of the contract:	Supplies
Main classification (cpv):	38300000 Measuring instruments
Options:	
Description of the	These estimates are based on a minimum purchase volume for the expansion of the monitoring network, plus an annual purchase of 20 data loggers and 20 accelerometers. The annual quantities are not

Rijksoverheid

options:	guaranteed and may vary from year to year. The estimate is based on the highest unit price and the most expensive configuration of the data loggers.

5.1.2 Place of performance

Country subdivision (NUTS):	Utrecht (NL350)
Country:	Netherlands
Additional information:	De Bilt

5.1.3 Estimated duration

Duration:	96 Month

5.1.4 Renewal

Maximum renewals:	4
Other information about renewals:	A shorter contract term would result in disproportionate technical, organizational, and validation costs and could pose risks to the continuity and comparability of measurement data. KNMI therefore proposes a framework agreement with an initial term of four (4) years, followed by four optional extensions of one (1) year each, resulting in a maximum total duration of eight (8) years.

5.1.6 General information

Reserved participation:	Participation is not reserved.
The names and professional qualifications of the staff assigned to perform the contract must be given:	Not required

Procurement Project not financed with EU Funds.

The procurement is covered by the Government Procurement Agreement (GPA):	yes

5.1.7 Strategic procurement

Aim of strategic procurement :	No strategic procurement

5.1.9 Selection criteria

Sources of selection criteria:	European Single Procurement Document (ESPD)

Electronic invoicing:	Required
Electronic ordering will be used:	no
Electronic payment will be used:	no

5.1.15 Techniques

Framework agreement:

Framework agreement, with reopening of competition

Maximum number of participants:	1
Justification for the duration of the framework agreement:	KNMI considers a framework agreement with a duration exceeding four years to be justified for this procurement due to the highly specialized nature of the seismological monitoring equipment and the need to ensure continuity, technical compatibility, and consistent measurement data across the national monitoring network. The proposed contract term is consistent with the public procurement principles of proportionality, efficiency, and transparency. Given the long technical lifespan of the equipment, the limited number of specialized suppliers in the market, and the need to maintain consistent measurement data throughout the monitoring network, KNMI considers a longer contract duration to be both necessary and proportionate.

Information about the dynamic purchasing system:

No dynamic purchase system

5.1.16 Further information, mediation and review

Review organisation:	Ministerie van Infrastructuur en Waterstaat - Rechtbank Den Haag
