Activity of the contracting authority:	Defence

2. Procedure

2.1 Procedure

Title:	C-UAS Redrone hard-kill integration
Description:	In order to guarantee opertional defense readiness, an expansion of the Redrone counter-drone system is required. While the current system provides 'softkill' capabilities, the new requirement introduces 'hardkill' effectors to increase operational range and lethality. This involves the integration and delivery of 6 interceptor drones, allowing the system to not only hijack but also physically destroy detected drones.

Justification for direct award:	Need for additional works or services by the original contractor

"The project is slated for completion by December 1, 2026. Integration requires access to the Redrone software source code to ensure seamless interoperability. Elbit, as the developer and owner of said code, is

Rijksoverheid

Other justification:	the only party capable of this task. The integration must not void the existing warranty, which is valid until at least January 2028. Only Elbit can guarantee this continuity. Due to the unique combination of software ownership and warranty requirements, no equivalent alternative exists. Therefore, no competition is possible."
