Onderwerp:
DDP terms

Vraag:
We are also confused on the shipping terms of DDP and then the later call that VAT costs are excluded.

Per the terms of the Performance of the activities, 3.1 the tool is to be shipped DDP. In this case the seller, is liable for any import taxes which were not initially on the quote.
But in section 11.2 it states:

All prices and rates are fixed and exclude VAT, but are inclusive of all other costs that are related to the performance of the Agreement.

Can you please clarify which is correct.

Antwoord:
The equipment should be shipped under DDP conditions. Supplier is responsible for any costs, include import taxes.
