2. Procedure

2.1 Procedure

Title:	Similarity detection software
Description:	Wageningen University & Research (WUR) intends to procure a SaaS solution for similarity detection to support academic and scientific integrity in education and research. The solution must enable the comparison of submitted academic and scientific written work against a broad and relevant range of sources, including internet sources, previously submitted work and scientific publications, including relevant full-text paywalled scientific content. The scope of the contract includes the provision of the software as a service, implementation and configuration, integration with relevant WUR systems, including Brightspace and OSIRIS Zaak, transition and migration where applicable, maintenance, support, information security, privacy and related service provision. WUR is conducting a restricted procedure. Following the selection stage, WUR intends to invite a maximum of five suitable Candidates to participate in the contract award stage, in accordance with the Selection Guidelines. The estimated contract value is indicative and does not constitute a budget, guaranteed turnover or minimum purchase commitment. The actual contract value will depend on the Tender and the services actually provided during the term of the Agreement.
